

Ne III levels faster than 5.00 ns

144 of 282 levels, in 69 fine-structure multiplets · 44 inside the 1 – 1000 ps window · energies above the ground state at 0 eV

even parity

odd parity

— 1 - 1000 ps (target window) — outside it, still under 5.00 ns

$\tau = 1/\Sigma A_{ki}$ over every known channel · ↓ = strongest decay channel
