

Y I levels faster than 5.00 ns

1 of 193 levels, in 1 fine-structure multiplets · 0 inside the 1 – 1000 ps window · energies above the ground state at 0 eV

even parity

odd parity

— 1 – 1000 ps (target window)

— outside it, still under 5.00 ns

$\tau = 1/\Sigma A_{ki}$ over every known channel · $\downarrow$ = strongest decay channel
